Experience

Celeste Cake Shop
eCommerce Developer | July 2022 - Present
– Designed and deployed landing site for client and maintained code using HTML, JSX, Tailwind CSS, and Javascript.
– Built an e-Commerce web-application using Next.JS, Sanity, and Stripe API.

Finca
Frontend Engineer | March 2022 - September 2022
– Developed an internal dashboard application using Next.js to allow admins to manage scheduling and booking of consultants, edit booking details, and delete bookings.
– Built reusable components using Styled-components and Tailwind CSS following design instruction from Figma.
– Utilized GraphQL and ApolloClient to manage queries and data mutations to the backend.
– Translate UI component designs into functional, modular, and reusable code.
– Developed code in an agile development team, documenting code and tracking tasks.
– Developed an automated End-to-End Testing framework using Cypress and Mocha.

Full Stack Developer
Freelance | March 2020 - Present
– Designed and deployed full-stack, single-page web applications with RESTful routes using modern frontend framework.
– Developed UI components using React and Redux combined with node package to perform more interactive effects for users.
– Experienced in creating and maintaining CRUD RESTFUL applications.
– Generated dynamic content using Styled Components and implement user-authentication schemes by incorporating different types of databases

Personal Projects

Spotify Clone
https://sp-clone.vercel.app/
https://github.com/wbenarto/sp-clone
- Web application built using Next.js and Spotify Web API. Created personalized dashboard for user.
- Managed User Sign In using OAuth and Spotify Login API.
- Experimented using Atoms/recoil as state management
- Created responsive components utilizing Tailwind-CSS

FreeCodeCamp - Contributor
